

SYSTEM AND METHOD FOR COLLECTING AND ANALYZING
TAX REPORTING SURVEYS

ABSTRACT OF THE DISCLOSURE

A method for calculating tax credit information
5 includes providing an on-line reporting form to a
plurality of users. Information regarding allocation of
financial resources regarding one or more projects
associated with more than one of the plurality of users
is collected from the more than one of the plurality of
10 users. Tax credit information is calculated based upon
the allocation of financial resources regarding the one
or more projects. In accordance with the particular
embodiment, at least some of the information collected
from the more than one of the plurality of users is
15 automatically verified while the information is being
input by the more than one of the plurality of users.
The automatic verification may include comparing
information with stored data within one or more database.
